a
diagonal slice $u(t,t)$ with $m \pm 1.96s$ bands
equality-only mean
constrained mean
truth $u_\star$
u
t (along $x = y$)
b
equality-only mean
free corner
c
constrained mean
d
combined 1.96s half-width
1.96s
e
equality error $m - u_\star$
f
constrained error $m - u_\star$
error
g
truth $u_\star$ and setup
boundary data ($x = 0$, $y = 0$)
PDE collocation
monotonicity virtual points
x
y
